## **DETAILED ACTION**

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: the "brief description of the drawings" section is located within the section for "detailed description

of invention" and is without a sub-heading. The preferred order for the specification is that the "brief description of the drawings" be located *before* (preceding) the "detailed description of invention" and also that there be inserted a subheading for it as outlined above.

Appropriate correction is required.

### ***Claim Objections***

Claim 7 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 7 depends on (in the alternative) claim 2, which already gives the article(s) as container. Thus, there is no need to repeat this assertion.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-5, 7, and 12 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "removing same" in line 8. Same what? Several things are mentioned in the sentence prior to this statement. A reader cannot just assume one of

them is being referred to while the others are not. There is no antecedent basis for the recitation.

Claim 3 recites that the article is contacted at about a center of gravity. This is odd considering actual location of the center of gravity is within the fluid being contained by the container/item, thus the center of gravity of a bottle cannot actually be "contacted".

Claim 3 recites the limitation "said article" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "thereof" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "said article" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "thereof" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the degree" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the speed" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the article" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the selected articles" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the article" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 recites the limitation "the article" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "same" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 2,945,588.

Claims 1, 3-6, and 8-18 rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4,549,272.

Claims 1-18 rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4,142,636 (and thus DE 2728473).

Claims 2 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4,694,158.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references were retrieved which deal with the field of the instant invention. Please review them prior to amending the claims.
